MODEL INCIDENCE METER

ROB404 \$40.00

The Robart Model Incidence Meter is a must for setting proper thrust and wing stabilizer incidences on a new model — or on one that shows some mysterious misalignment. It features an improved steel counterweight, precision pointer, and anti-parallax scale, new magnified meter face, and an easy-to-read bubble level.

SUPER STAND II

Fully Adjustable Model Stand & Work Station.

ROB402 \$16.99

Fits any size airplane from small gliders to Giant Warbirds. The Super Stand II makes for a great building platform, its sturdy, lightweight, and waterproof, and it is unaffected by glow fuel. Soft rubber pads will not harm or scratch models. Quick set-up for any building, maintenance, or transportation needs.
